## AREA AND VOLUME

Name:
Assessment Criteria: Deduce and use formulae for the area of a triangle and parallelogram, and the volume of a cuboid; calculate volumes and surface areas of cuboids.

1. The area of a rectangle is given by $\mathrm{A}=\mathrm{b} \times \mathrm{h}$. Use the diagrams below to show two different ways in which in can be demonstrated that the area of a triangle is given by $A=1 / 2 \times b \times h$.

b
2. Again, knowing the formula for the area of a rectangle, show why the formula for the area of a parallelogram is also $A=b \times h$.

3. Find the areas of the following shapes:
a)

b)

c)

18 cm $\qquad$ $\mathrm{cm}^{2}$
d)

4. For each of the following cuboids, put a ring around its correct volume and surface area: (NO METHOD = NO MARKS!)
a)

Volume: $18 \mathrm{~cm}^{3} \quad 36 \mathrm{~cm}^{3} \quad 11 \mathrm{~cm}^{3}$

Surface area: $18 \mathrm{~cm}^{2} \quad 36 \mathrm{~cm}^{2} \quad 72 \mathrm{~cm}^{2}$
a)

Volume: $42 \mathrm{~cm}^{3} \quad 12 \mathrm{~cm}^{3} \quad \begin{aligned} & 294 \\ & \mathrm{~cm}^{3}\end{aligned}$

Surface area: $18 \mathrm{~cm}^{2} \quad 41 \mathrm{~cm}^{2} \quad 82 \mathrm{~cm}^{2}$

| Overall, I think my success level is: | Low 0 High |
| :--- | :---: |

| Q | AREA AND VOLUME | (:) | 0 |
| :--- | :--- | :---: | :---: |
|  | I can deduce the area of a triangle from the area of a rectangle |  |  |
|  | I can deduce the area of a parallelogram from the area of a rectangle |  |  |
|  | I can calculate the area of a triangle |  |  |
|  | I can calculate the area of a parallelogram |  |  |
|  | I can calculate the volume of a cuboid |  |  |
|  | I can calculate the surface area of a cuboid | I can present a concise, reasoned argument, using symbols, diagrams, graphs <br> and related explanatory texts |  |
| I |  |  |  |

I need to practise ...
